### DETAILED ACTION

The allowance of the claims has been withdrawn in light of newly applied prior art.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15-17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Browning, U.S. Pat No 5,525,868.

Browning discloses the claimed invention including a micro-fabricated charge emission device having an emitter 20; controllable means 25,90 for supplying to the emitter a controlled amount of current that produces a potential difference at the emitter with respect to an electrode 15 to induce the emitter to emit electrical charge; and means R1 for shunting at least a portion of the supplied current to ground upon a detection of a particular condition, see, for example figure 4, column 3, lines 6-25, 34-47, column 4, lines 60+, column 5, lines 1-14.

Regarding claims 16-17, at least transistor 50 and control signal 35 may be seen as means for signaling the supplying means 25, 90 to supply the controlled amount of current and means for adjusting the current supplied to the emitter.

Regarding claim 19, the anode, where electrons from the emitter are collected, may be broadly seen as means for detecting a particular charge emission condition.

***Allowable Subject Matter***

3. Claims 1, 3-14, 20-21, and 23-38 are allowed.
